[Who we are](#)

[Defining the technology of today and tomorrow.](#)

[Philosophy](#)

We strive to create an environment conducive to many different types of research across many different time scales and levels of risk.

[Learn more about our Philosophy](#)

[Learn more](#)

[People](#)

Our researchers drive advancements in computer science through both fundamental and applied research.

Responsible AI

Our work

Projects

We regularly open-source projects with the broader research community and apply our developments to Google products.

Learn more about our Projects

Learn more

Publications

Publishing our work allows us to share ideas and work collaboratively to advance the field of computer science.

Learn more about our Publications

Learn more

Resources

We make products, tools, and datasets available to everyone with the goal of building a more collaborative ecosystem.

Learn more about our Resources

Learn more

Programs & events

Shaping the future, together.

Collaborate with us

Student programs

Supporting the next generation of researchers through a wide range of programming.

Learn more about our Student programs

Learn more

Faculty programs

Participating in the academic research community through meaningful engagement with university faculty.

Learn more about our Faculty programs

Learn more

Conferences & events

Connecting with the broader research community through events is essential for creating progress in every aspect of our work.

Other ways to get involved with Google Conferences & Events

Student research programs

Google Research offers fellowships, scholarships, internships and other student opportunities.

Learn more

Faculty research programs

We provide funding for academic research, as well as enable faculty to collaborate with Google researchers.
