Overview

GLM-4.5V is Z.AI's new generation of visual reasoning models based on the MOE architecture. With a total of 106B parameters and 12B activation parameters, it achieves SOTA performance among open-source VLMs of the same level in various benchmark tests, covering common tasks such as image, video, document understanding, and GUI tasks.

Introducing GLM-4.5V

1

Open-Source Multimodal SOTA

GLM-4.5V, based on Z.AI's flagship GLM-4.5-Air, continues the iterative upgrade of the GLM-4.1V-Thinking technology route, achieving comprehensive performance at the same level as open-source SOTA models in 42 public visual multimodal benchmarks, covering common tasks such as image, video, document understanding, and GUI tasks.

2

Support Thinking and Non-Thinking

GLM-4.5V introduces a new "Thinking Mode" switch, allowing users to freely switch between quick response and deep reasoning, flexibly balancing processing speed and output quality according to task requirements.
